The focus of this podcast discussion is flipped learning, also known as the flipped classroom. The major topics covered include the preparation required to establish a flipped classroom, the actual implementation of the flipped learning technique, student accountability, advantages and disadvantages/challenges, and the outcomes that may result from using the flipped learning approach. This discussion is intended to analyze one way technology can influence the future of education.

> *"I really think it is the way of the future…everyone in that room has the knowledge that we are supposed to have to discuss, synthesize, evaluate, and analyze; all of the higher level things that we always want our students to do."*
> *Patricia Murthy*
